These samples reiterate the points reviewed in Sections I & II.

Three Final Samples to Note

I have found that some of the most effective films even in our Catholic culture contain humor. There is a sample of a LipDub film in the samples link that in spite of its lack of visual perfection racked up over 3,000 views and a firestorm of excitement in the school/parish community within 48 hours of its publishing.

There is also a film of the Ward HS 'Ward Walk' that features kiddos commenting on their journey and their excitement about the Ward Walk Event. Again, this little film which was captured several years ago still holds up today because the students words, actions and countenance point us towards our better selves as sons and daughters of God. I hope you get a chance to allow these two films bring some joy to your heart and activate your imagination for what is possible and more for your Catholic school/organization.

Lastly, there is an example featuring only elementary school voices (off-camera) commenting on their school and experience. The visual simply uses stills set to a backdrop of a very emotive piece of music. Here is a very attainable creative treatment using only voices, photos and an underscore are used; no video. This is something that can be very effective at a gala styled event and used for a number of hopeful outcomes.

If you have any questions or there is anything I can potentially assist you with please feel to email, text or call. Cell: 816-785-7818
